JOINT REPORT OF THE VICE-PRESIDENT AND THE DIRECTOR

June 30, 1954

The Honorable Robert F. Kennon
Governor of the State of Louisiana
Baton Rouge, Louisiana

Dear Governor Kennon:

The Vice-President of the Board of Administrators and the Director of the Charity Hospital of Louisiana at New Orleans submit the following report of the activities of the hospital covering the period from July 1, 1953 to June 30, 1954, inclusive.

The following members continued their services on the Board of Administrators during the past year:

Dr. E. L. Leckert
Mr. George Van Kuren
Mr. Thomas C. Fischer
Dr. P. H. Jones
Dr. Edmund Connely
Dr. J. O. Weilbaecher, Jr.
Mr. A. L. Wetterhall
Dr. Felix A. Planche
Dr. N. J. Tessitore

Mr. William August Worner was re-elected Vice-President.

Mr. L. A. Millet was re-elected Secretary-Treasurer.

Mr. William E. Schulingkamp's term expired and Mr. John W. Bowen was appointed to succeed him.

The Members serving on the standing Committees were as follows:

Finance Committee—

Dr. Felix A. Planche, Chairman
Mr. George Van Kuren
Mr. Thomas C. Fischer
Mr. A. L. Wetterhall

Medical Committee—

Dr. J. O. Weilbaecher, Jr., Chairman
Dr. P. H. Jones
Dr. Edmund Connely
Dr. Felix A. Planche
Dr. N. J. Tessitore

House Committee—

Mr. George Van Kuren, Chairman
Dr. P. H. Jones
Dr. Edmund Connely
Mr. Thomas C. Fischer
Mr. A. L. Wetterhall
Mr. John W. Bowen

Dr. Jack T. Jackson, Assistant Clinical Director in Surgery, completed his Residency on June 30, 1953, and left the Hospital to enter private practice.

Dr. Alvin J. Fray, continued to serve as Assistant Clinical Director in Medicine.

Mr. A. P. Richard, II served throughout the year as Administrative Assistant.

Mr. F. I. Williams, Jr. was appointed as Comptroller on June 26, 1953.

Dr. Carl E. Blunck, Jr. was appointed as Assistant Director on August 1, 1953.

HOSPITAL BUILDINGS

Main Building—This building contains a total of 2,963 beds devoted to patients' care—divided as follows: Medicine, Surgery, Premature Infant Section, Pediatrics, Gynecology, Radium, Orthopedics, Urology, Eye, Ear, Nose and Throat, Dermatology, Obstetrics, Nurseries, Dental Surgery, Psychiatry and unassigned beds.

The other departments are as follows: Operating Rooms (including two surgical amphitheaters), Delivery Rooms (including Obstetrical Operating Rooms, Pathology Department, Anesthesia Department, Diagnostic and Therapeutic X-Ray Department, Cardiology Department, Physical Therapy, Medical Records Library, Electroencephalographic Department, Social Service Department; operating the following Clinics: General Surgery, Plastic Surgery, Thoracic Surgery, Neuro-Surgery, Vascular Diseases, Tumor, Fracture, Orthopedics, Obstetrics, Post-Partal, Gynecology, Male and Female Urology, Special Therapy, Obstetrical Special Therapy, Glaucoma, Male and Female Medicine, Refraction, Ear, Nose and Throat, Dental Surgery, Dental (Caries), Psychiatry, Scrapping, Hematology, Dermatology, Allergy, Clinic Cystoscopy, Pasteur, Alcoholic Rehabilitation and Diagnostic Pain Clinic.

This building also contains a non-sectarian Chapel, Catholic Chapel, Dietary Department (with dining rooms for doctors, nurses, and employee), Visitors' Food Service for White and Colored, Bakery Shop, Linen and Sewing Rooms, Auditorium, Post Office, Hospital Laundry, Hospital Library, Occupational Therapy, Business Offices and Administrative Offices covering every phase of the Administration of the Hospital.

The 13, 14, 15, 16, 17, and 18th floors of the building are the living quarters of the intern and resident physicians attached to the Hospital. The 19th floor is devoted to recreation rooms for doctors assigned to the institution.

Dibert Tuberculosis Building—The interior of the Dibert Building was completely renovated.

Ice making machines were furnished, metal awnings were installed on all windows on three sides of the building, dressing rooms and showers were renovated, interior was painted, new fans were purchased in those wards where fans were needed, a new dishwashing machine was purchased and installed, new scrub sinks were purchased and installed on all floors, and the nurses stations were rebuilt and modernized.

All other hospital buildings are in good condition, repairs and improvements having been made where necessary during the year.

DEPARTMENTAL UNITS

Radiology Department—During the past year, 147,161 patients were examined and 305,287 films processed. Fluoscopies numbered 8,800.

In the Therapeutic Division, 52,416 patients were treated by Roentgen Therapy and 233 by Radium.

Pathology Department—686,060 laboratory tests were made during the past year and 1,479 autopsies performed.

Sixteen students were admitted to the School of Medical Technology, 19 completed their training, and 15 are still training in this approved school.

Dietary Department—1,284,063 meals were served to personnel, 2,398,935 to patients and 841,872 special diets prepared. In addition, 76,021 formulae were prepared and served throughout the past year.

This department graduated twelve dietetic interns, one of whom accepted a position on the staff.

Operating Rooms—13,387 major operations and 481 Caesarean sections were performed.

Admissions—During the year, 19,920 white and 46,469 colored patients were admitted to the hospital, a total of 66,389 admissions.

Nurses—Within the last year, 91 were graduated from the School of Nursing and 96 students were admitted for training.

During the past year, the Nursing Service Department had in its employ the following personnel to render nursing care to the patients:

Professional Nurses

137	Supervisory Staff (Religious and Lay)
146	General Duty Staff

Non-Professional Employees

93	Licensed Practical Nurses
447	Nurse Aides II and III

Out-Patient Clinics—During the past year, 116,121 patients were treated in the Admitting Rooms of this hospital, 90,493 patients were seen in its Accident Rooms, and 459,226 visits were made by 93,810 patients in the Clinics.

Blood Banks-Anesthesia-Gas-Therapy—These Departments are under the supervision of Dr. John Adriani.

In the Blood Bank, the system of processing and manufacturing our bottles and tubings was discontinued and the standard vacuum disposable equipment was adopted. During the year, there were 19,757 transfusions administered and 21,000 bottles of blood collected.

The Department of Anesthesia administers anesthetics to all Surgical cases subjected to operations in the hospital. In addition, it operates a clinic in which nerves are blocked for the specific purpose of controlling otherwise intractable pain. Equipped to administer all types of anesthetics, this department has rendered invaluable service to the patients and hospital.

A total of 22,000 anesthetics of all types were administered to obstetrical and surgical patients.

The Gas Therapy Department conducts the administration of oxygen and other gaseous therapeutic agents in the hospital. In addition, this department is responsible for the maintenance of all equipment necessary for the conduction of inhalation therapy.

Personnel Department—The total number of active employees as of June 30, 1954, were 3,066.

All personnel actions are governed by the rules of Civil Service and the increased amount of work brought about by the necessity for submitting forms affecting personnel of the hospital to the State Civil Service De-

partment resulted in an expansion of the department and the employment of additional clerical help. The personnel functions of the Nursing Service Department were combined with this office and all files, records, personnel and effects of that service were transferred from the fifth floor to the second floor.

Representatives of the Department of State Civil Service have conducted many job audits of positions throughout the hospital and positions which were improperly classified have been reallocated. Spot-checks will be made in all areas from time to time to insure our adherence to the specifications set up in the class plan. Other officials of that department have spent several days in the personnel office checking its records and eliminating discrepancies. A most favorable report was submitted to the State Director of Personnel by these people.

Rehabilitation Unit (Alcoholic)—In the Alcoholic Rehabilitation Unit, 318 patients were treated in the ward and clinic.

Artificial Kidney Station—In December 1953, the Board of Administrators approved the establishment of an Artificial Kidney Unit and Laboratory in conjunction with the L.S.U. Medical School.

Sister Paula—Charity Hospital suffered the loss of one of its staunchest pillars when Sister Paula passed away on December 26, 1953. She had been stationed at Charity Hospital for 45 years, during most of which time she had served as Supervisor of the Operating Rooms. A plaque in her memory was installed at the Hospital.

Donations—Dr. and Mrs. David Heiman donated two television sets for patient use.

Four television sets were given by Mr. Morris Kirschman and one television set by Mrs. L. Templeman.

One wheel chair was given by Mrs. T. H. Hall in memory of her departed husband.

Dr. David Heiman presented a new Gordon-Armstrong incubator to the Pediatrics Department, in honor of Mr. Phil McCabe, a deceased friend of the Hospital.

Mr. Arthur continued to donate toys and equipment to the Pediatric Play Program.

Mrs. Sara Lee Judis, President, Happiness Helpers Club, donated \$500.00.

Capital Improvements—The following improvements were made throughout the hospital:

1. A new 48-inch extractor was purchased for the hospital laundry at a cost of \$3,700.00.
2. Flood gates have been installed at the LaSalle Street entrance to the main building to prevent a re-occurrence of the recent flooding of the basement.
3. An open shed has been constructed for the protection of the hospital's automotive equipment from the elements.
4. The real estate owned by the hospital under the Allison Legacy has had a new roof installed on it at a cost of \$489.00.
5. The Lung Station was air-conditioned at a cost of \$4,090.90. The expenditure was charged to the McBurney Fund of the hospital's endowment.
6. The establishment of a Virus and Rickettsial Laboratory was approved by the Board, to be financed by a Federal Grant.

7. The new Solution Room for the preparation of Intravenous Solutions was completed and placed in operation.
8. The Recovery Rooms of the hospital were removed to the twelfth floor and were completely modernized.
9. Extensive additions to the Medical Record Library were authorized and completed.
10. The unloading platform at the main building of the hospital was doubled in size and a new scale was installed thereon to check the weight of incoming shipments.

ACKNOWLEDGEMENTS

Too much credit cannot be given to the Sisters of Charity for their unfailing interest, splendid co-operation and untiring labor. With Sister Antonia as Directress, they have performed excellent services in this hospital in numerous capacities.

The Volunteer Workers, under the guidance of Miss Florence Jennings, have rendered very valuable services to this Institution during the year.

We want to express appreciation to the Deans of the two medical schools, Dr. W. W. Frye, Louisiana State University, and Dr. M. E. Lapham, Tulane University. They have worked with us and have thus helped to create a close harmony between the hospital and the medical schools.

Another group, the Charity Hospital Guild, under the able supervision of Miss Nellie Boudreaux, has aided tremendously in supplying surgical dressings for this Hospital.

To the Visiting, Resident and Intern Staffs, our sincere thanks for their loyalty and splendid support.

We also wish to express our appreciation to the National Council of Jewish Women for their generous contribution in the form of a Pediatric Recreational Program, under the direction of Mrs. Amy Harrison.

To the Board of Administrators we express our appreciation for their guidance and loyal support, and we are deeply grateful to the Assistant Directors for their wholehearted assistance. The Heads of all Departments and the entire personnel of the Hospital, nurses and workers in all departments, all have our deepest gratitude for their loyalty, devotion and wonderful co-operation.

Respectfully submitted,

WILLIAM AUGUST WORNER,
Vice-President Board of
Administrators

E. L. LECKERT, M.D.,
Director

COMMENTS ON OPERATIONS

Fiscal Year July 1, 1953 to June 30, 1954

Cost of operation for the fiscal year ended June 30, 1954, compared with the previous fiscal year increased \$434,706.57, or 5.10% as evidenced by the following comparative analysis:

	FISCAL YEAR		Increase	% Increase
	1952-1953	1953-1954		
Salaries	\$5,352,506.14	\$5,763,747.47	\$411,241.33	7.68
Food	952,072.90	919,981.99	32,090.91*	3.37*
Drugs and Surgical Supplies	1,281,400.92	1,293,100.34	11,699.42	.91
Other Operating Expenses	810,024.08	802,892.34	7,131.74*	.88*
Repairs and Maintenance Expense	126,033.30	177,021.77	50,988.47	5.66
	<u>\$8,522,037.34</u>	<u>\$8,956,743.91</u>	<u>\$434,706.57</u>	<u>5.10</u>

Comparative Statement—Means of Financing

	1952-1953	1953-1954	Increase	Decrease
State Appropriation	\$8,464,514.00	\$8,439,514.00		\$ 25,000.00
Special Legislative Appropriation		250,000.00	\$250,000.00	
Legislative Deficiency Appr.		220,431.00	220,431.00	
Federal and Other Grants..	238,049.04	135,831.29		102,217.75
Bond Liquidation Fund	279,017.50	284,930.93	5,913.43	
	<u>\$8,981,580.54</u>	<u>\$9,330,707.22</u>	<u>\$476,344.43</u>	<u>\$127,217.75</u>

Expenditures during the fiscal year were made and accounted for in accordance with the provisions of the State Budget Act.

All obligations incurred and due by the Hospital as of June 30, 1954, are current and accounted for and liabilities set up therefor.

At the close of the fiscal year June 30th. there is shown an unencumbered surplus in the Operating Funds of \$54,820.36 subject to be returned to the State Treasury in accordance with the General Appropriation Act (Act 271).

*Denotes RED Figure.

Following our customary practice, we have taken advantage of all cash discounts in accordance with the terms of purchase contracts. Cash discounts earned during the year amounted to \$30,343.82. During the year we paid \$42,365.23 in State Sales Tax.

The employees in the Maintenance and Engineering Departments were paid \$15,559.18 for emergency overtime work during the year as compared with \$30,607.71 paid the previous year.

During the year we received from the U. S. Surplus Commodities Corporation food evaluated at \$30,911.75, which value is not included in the cost of food consumed.

The ratio of cost of operation as between Personal Service Cost and "Other Expenses" has shown no material change for the fiscal year as compared with the previous fiscal year as revealed by the following:

	Salaries		Other Expenses	
	Cost	Percent	Cost	Percent
Fiscal Year 1953-1954.....	\$5,763,747.47	64.35	\$3,192,996.44	35.65
Fiscal Year 1952-1953.....	5,352,506.14	62.81	3,169,531.20	37.19
	<hr/>	<hr/>	<hr/>	<hr/>
	411,241.33	1.54	23,465.24	1.54*

The cost of Pharmaceutical, Medical and Surgical Supplies used as compared with the previous fiscal year increased \$11,699.42, or .91% accounted for as follows:

	FISCAL YEAR			De- crease
	1952-1953	1953-1954	Increase	
Pharmaceuticals	\$ 586,058.19	\$ 602,689.80	\$16,631.61	.284
Medical and Surgical Supplies	530,501.44	534,912.82	4,411.38	.83
X-Ray Films & Photographic Supplies	164,841.29	155,497.72	9,343.57*	5.67*
	<hr/>	<hr/>	<hr/>	<hr/>
	\$1,281,400.92	\$1,293,100.34	\$11,699.42	.91

Inventory-Materials and Supplies—\$246,222.51	6-30-53	6-30-54	Increase	Decrease
Pharmaceuticals	\$ 85,696.04	\$ 81,514.47		\$ 4,181.57

At the end of the fiscal year June 30, 1954, physical inventories were taken of all consumable materials and supplies in stores. It was

*Denotes RED Figure.

found necessary to adjust book inventories (1) due to shortages \$1,208.30, (2) Obsolete and unusable supplies carried in Maintenance Department Stores for a number of years were transferred to "Salvage" and charged off at cost value, viz: \$4,368.23.

Materials and Supplies Inventory turnover during the fiscal year were as follows:

	Turnover Ratio
Pharmaceuticals	7.21
Food	14.89
Household Supplies	5.13
Office and Multigraph Supplies	5.15
Maintenance Materials and Supplies99
Medical and Surgical Supplies	5.95

Inventory of Materials and Supplies on hand as of June 30, 1954, was evaluated at cost.

Contractual Commitments—\$126,901.92

	6-30-1954	6-30-1953
Contractual Services	\$ 2,925.00	\$ 4,648.17
Materials and Supplies	50,844.55	99,280.06
Equipment—Automotive	17,140.38	6,388.60
Equipment—General	20,170.00	2,721.86
Major Repairs to Buildings and Equipment.....	33,791.00	28,530.00
State Sales Tax	2,030.99
	<u>\$126,901.92</u>	<u>\$141,568.69</u>

Commitments represent Purchase Orders issued prior to June 30, 1954 applicable against the fiscal year's appropriation for which deliveries were effected subsequent to the close of the fiscal year. Also Purchase Commitments authorized by the Board of Administrators prior to June 30, 1954.

Capital Expenditures—\$76,670.17

Expenditures for additional and replacement of worn out Equipment out of "Operating Funds" amounted to \$61,242.41, compared with \$68,531.70 expended the previous fiscal year. Equipment purchased out of Trust Funds during the year amounted to \$15,427.76. See detail statement Sch. I-C of equipment purchased.

Employees Retirement Plan

	1953-1954	1952-1953	Increase
Hospital Contribution to Retirement Plan	\$302,849.65	\$282,194.40	\$20,655.25
Employees' Contribution to Retirement Plan	253,035.43	235,169.52	17,865.91
	<u>\$555,885.08</u>	<u>\$517,363.92</u>	<u>\$38,521.16</u>

Ninety-two percent of the employees are members of the State Retirement Plan. The employee contributes 5% of his gross earnings and 6% is contributed by the Hospital.

As of June 30, 1954, there were 3,148 employees on the payroll as compared with 3,076 as of June 30, 1953, an increase of seventy-two.

Comparative Cost of Patient-Care

	1953-1954	1952-1953	Increase	Decrease
Patients Admitted	66,389	65,239	1,150	
In-Patient-days	842,872	847,719		4,847
Avg. Cost per Patient-day	\$9.79	\$9.26	.53	
Out-Patient Visits (Clinics)	554,819	602,533		47,714
Avg. Cost per Patient-Visit	\$1.27	\$1.12	.15	

Sundry Revenues

Collections during the year for services rendered ineligible patients, fees, licenses and miscellaneous income amounted to \$196,642.83 as compared with \$183,797.87 the previous year, an increase of \$12,844.96, accounted for as follows:

	1953-1954	1952-1953	Increase	Decrease
Patient Services	\$ 96,893.91	\$ 81,107.19	\$15,786.72	
Licenses	23,605.00	26,392.50		\$2,787.50
Fees	55,492.68	55,909.86		416.18
Sundry	20,650.24	20,388.32	261.92	
	<u>\$196,642.83</u>	<u>\$183,797.87</u>	<u>\$16,048.64</u>	<u>\$3,203.68</u>

As provided by General Appropriation Act 271 of 1950, all collections of Sundry Revenues were transferred to the State Treasurer.

Federal and Other Grants received and retained as a Means of Financing amounted to \$135,831.29 during the year as compared with \$238,049.04 the previous year, a decrease of \$102,217.75, accounted for as follows:

	1953-1954	1952-1953	Decrease
Maintenance of G. I. Students.....	\$ 3,104.97	\$ 7,405.34	\$ 4,300.37
National Foundation for Infantile Paralysis	68,440.34	155,154.70	86,714.36
National Mental Health Fund.....	12,444.00	18,667.00	6,223.00
Training Program in Premature Infant Care	51,841.98	56,822.00	4,980.02
	<u>\$135,831.29</u>	<u>\$238,049.04</u>	<u>\$102,217.75</u>

Accounts Receivable

Miscellaneous Accounts Receivable of record as of June 30, 1954, viz: \$7,380.54 are current obligations due the Hospital and are considered 100% collectible. The amount of \$13,268.42 due by the National Foundation for Infantile Paralysis represents charges against the State Parish Chapters and is guaranteed by the Foundation.

Insurance

Adequate insurance has been provided on all Hospital properties. Also all employees are covered by Workmen's Compensation Insurance. Premiums paid during the year amounted to \$36,299.48, as compared with \$37,455.93 paid the previous year.

Surplus—June 30, 1954—\$388,112.85

The surplus as of June 30, 1954, shown on the Balance Sheet is represented by the following summarized current assets:

Inventory—Materials and Supplies	\$246,222.51
Purchase Order and Other Contractual Commitments Outstanding 6/30/54 for which funds have been committed..	126,901.92
Prepaid Insurance	14,293.42
Deposits on Containers	695.00
	\$388,112.85

Visitors' Food Service Department

The operation of the Cafeteria is financed by a separate Legislative Appropriation of \$7,500.00 as a Revolving Fund subject to be returned to the State General Fund should the operation of the Unit be discontinued.

Net Profits earned during the year amounted to \$21,760.25, compared with earnings of \$13,340.67 the previous year, an increase of \$8,419.58.

The operation of the Cafeteria showed a net loss of \$2,040.32, however, commissions earned from soft drink vending machines amounted to \$23,800.57.

Trust Funds

During the fiscal year various donations to the Hospital were received, amounting to \$52,730.23, as follows:

Restricted as to Use	\$29,715.98
Unrestricted as to Use	23,014.25
\$52,730.23	

Income received from investments of Trust Funds amounted to \$144,055.86, represented by the following:

	Restricted	Unrestricted	Total
Interest	\$16,422.29	\$53,513.26	\$ 69,935.55
Rent	21,676.00	10,099.94	31,775.94
Royalties		3,767.64	3,767.64
Leases	15,756.00	9,313.73	25,069.73
Dividends	507.00	13,000.00	13,507.00
	\$54,361.29	\$89,694.57	\$144,055.86

Expenditures out of Trust Funds during the fiscal year amounted to \$95,160.07, as follows:

	Restricted	Unrestricted	Total
Salaries	\$21,749.87	\$ 2,430.00	\$ 24,179.87
Repairs to Trust Fund Buildings	1,072.58	30,897.26	31,969.84
Indigent Patients' Welfare	9,916.75	3,805.94	13,722.69
Repairs and Renovations—Hospital Buildings		6,642.40	6,642.40
Capital Expenditures	4,546.58	10,881.18	15,427.76
Sundry	2,175.56	1,041.95	3,217.51
	\$39,461.34	\$55,698.73	\$ 95,160.07

Trust Fund Investments—Bonds

	1953-1954	1952-1953
Principal Funds—Investments	\$ 2,291,290.28	\$ 2,270,104.47
Income Funds—Investments	731,375.99	642,172.32
	\$ 3,022,666.27	\$ 2,912,276.79

At the end of the fiscal year, after amortization of Bond discounts and premiums, it will be noted that Investments in Bonds increased \$110,-389.48, as compared with investments as of June 30, 1953. Of the total investments, 31.54% represents investments in State and Municipal Bonds and 64.46% in U. S. Treasury Bonds.

Bond Liquidation Fund

During the fiscal year \$299,000.00 of Bond obligations were retired and total interest on bonded indebtedness amounting to \$216,115.00 was paid. In compliance with the request of the State Auditor, we returned to the State General Fund \$300,896.23, representing unencumbered accumulation of funds prior to June 30, 1952.

As authorized by the Board of Administrators \$285,938.73 was transferred to Operating Funds during the fiscal year.

The balance of \$417,123.75 in the fund as of June 30, 1954, provides a reserve for the retirement of Bonds and Accrued Interest on Bond obligations due and payable as follows:

August 1, 1954	\$203,085.00
October 15, 1954	214,038.75
	\$417,123.75

Respectfully submitted,

L. A. MILLET
Secretary-Treasurer

PERSONNEL DEPARTMENT REPORT**July 1, 1953 to June 30, 1954**

All personnel actions are governed by the rules of Civil Service and the increased amount of work brought about by the necessity for submitting forms affecting personnel of the hospital to the State Civil Service Department resulted in an expansion of the department and the employment of additional clerical help. The personnel functions of the Nursing Service Department were combined with this office and all files, records, personnel and effects of that service were transferred from the fifth floor to the second floor. This move was accomplished with little difficulty and was made possible by furnishing the Personnel Department with the office space vacated by the Purchasing Department.

Service Ratings, prepared in the departments on all personnel who had been employed in the hospital for a period of three months or more, were processed through this office and all appeals were heard and settled by a special board. No appeal was referred beyond that board to the Department of State Civil Service.

Representatives of the Department of State Civil Service have conducted many job audits of positions throughout the hospital and positions which were improperly classified have been reallocated. Spot-checks will be made in all areas from time to time to insure our adherence to the specifications set up in the class plan. Other officials of that department have spent several days in the personnel office checking its records and eliminating discrepancies. A most favorable report was submitted to the State Director of Personnel by these people.

Respectfully submitted,

CHARLES C. STURTEVANT
Personnel Director

July 2, 1954

ANNUAL REPORT OF THE SISTERS DIVISIONS

Fiscal Year July 1, 1953 to June 30, 1954

The over-all-planning coordination and control of the activities of the Nursing Department, The Schools of Nursing, both Professional and Practical, and the Dietary Department, and the Housekeeping Department, all centered to the Sisters Divisions, have functioned smoothly and satisfactory during the past fiscal year.

The Sisters directing these departments will make detailed reports so this report will be brief and of a general nature.

The department of Professional School of Nursing have made the necessary changes in their curriculum, so as to meet the requirements of the National Accreditation Committee, which was recommended, with the view of receiving Full Accreditation, the school received Temporary Accreditation in the year of 1953, we believe by raising our educational standards, we hope to achieve greater efficiency, and better care of our patients, will also be a valuable asset in the recruitment program, thereby enabling us to recruit and select qualified members for our Nursing Staff.

The Nursing Service Department continues to give efficient service to the various departments, despite the fact of the nursing shortage of graduate nurses, while the task to supply the demand has been most arduous in an effort to give adequate service to our patients, we wish to commend the "Sisters" . . . the Graduate Nurses" . . . for their generosity in taking additional duties to supply for the vacancies in the graduate staff.

The School of Practical Nursing continues to give efficient service to the patients we feel the thorough preparation they receive during their training course, makes them aware of the needs of the patients, and we hope to retain them, or most of them for Nursing Service in Charity Hospital.

The Dietary Department has completed another successful year. The high standards of food service to the patients and personnel has been maintained, the Dietetic Interns training has met the requirements of the American Dietetic Association.

The housekeeping throughout the hospital and the living quarters of the personnel has been efficiently carried on through the year. A series of educational conferences to the personnel in this department has been given, and has proved very beneficial by improving the methods of cleaning, also has been a great help in the morale of the workers.

In February of this year 1954, it was deemed advisable to re-allocate the Anesthesia and Recovery Rooms to the 12th floor center, the close proximity to the operating rooms, has increased the efficiency in the care of the patients, the Surgeons and Anesthesia Staff, are in constant attendance with these patients, and the new equipment provided is most valuable, in preventing shock to the patients, there is no unnecessary moving, with such close medical and nursing supervision the patients remain in these recovery rooms, until they can be safely transferred to their respective wards. Another room has been provided to take care of contagious cases, who have had to be operated upon, where special isolation technic can be carried out.

During the re-construction of these rooms, it was thought advisable to provide electrical wiring for the use of the Iron Lung, which has been installed and has been used to the great advantage of certain type of operative patients, the nursing personnel in this department are specially trained, which facilitates the care of the patients.

Respectfully submitted,
SISTER ANTONIA, F.A., C.H.A.
Director of Sisters Divisions.

Miscellaneous Personnel

Total	6
	<u>1,301</u>

During the fiscal period of July 1, 1953, through June 30, 1954, the daily average number of patients in Charity Hospital was 2309. On June 30, 1954, the Nursing Service Department had in its employ the following personnel to render nursing care to these patients:

Professional Nurses

137	Supervisory Staff (Religious and Lay)
146	General Duty Staff

Non-professional Employees

93	Licensed Practical Nurses
447	Nurse Aides II and III

**Administrative Changes and Accomplishments in the
Nursing Service Department**

The Nursing Personnel Office, fifth floor, was consolidated with the Personnel Department, second floor, in October, 1953. This change relieved the Nursing Service Office of the responsibility for interviewing, selecting, processing, and maintaining records on employees in the Nursing Service Department.

The one-week orientation program for nurses was reduced to a maximum of one day in November, 1953. The routine physical examination required for nurses upon appointment to the staff is scheduled on the day of orientation.

The nurse aide trainee program was terminated in January, 1954. At that time, the Department of State Civil Service had established a roster of certified nurse aides, and trainees in the Nursing Service Department at Charity Hospital could not be assured of job opportunities upon completion of the nurse aide course. During the first six months of this fiscal year, 41 nurse aides were trained and employed on the Nursing Service staff.

The white and colored male urology patients were moved from eighth floor to eleventh floor, the white and colored pediatric tuberculosis patients from third floor of the White and Colored Tuberculosis Building to fourth floor of the Poliomyelitis Center, and the Recovery Room patients from eleventh floor to the new Recovery Room on twelfth floor. The rearrangement of these services has resulted in more adequate nursing care for the patients.

The Committee on Nursing Procedure Revisions which is composed of representatives from the Charity Hospital School of Nursing, the Charity Hospital School of Practical Nursing and the Nursing Service Department was very active during the year. The Committee reviewed forty recommendations for nursing procedure revision or initial development of new procedures. Twenty-three revisions were completed and one new procedure accepted.

The Health Clinic located in C602 reports a total of 3,676 patient visits during the fiscal year. In addition to these clinic visits, protective vaccination against typhoid fever was given to 331 patients, and a series of immunizations against tetanus was started with the initial administration of tetanus toxoid to 352 student nurses.

Sister Laurence, R.N., Director
Nursing Service Department

ANNUAL REPORT OF THE SCHOOL OF NURSING FOR THE FISCAL YEAR

June 30, 1953 to June 30, 1954

The school of nursing recognizing that its first responsibility is the education of the students whom it admits has concentrated on this responsibility during the past year.

CURRICULUM

In the curriculum the subjects and total number of hours of class taught have not been notably changed, but the placement and sequence have been rearranged to provide a block of learning in which experience on the ward and related classroom teaching are given concurrently. This arrangement has decreased the average hours of class per week as well as making the total learning situation more meaningful.

Besides the change in the class and experience schedule the instructors have assumed the responsibility of guiding and evaluating the work of the students on the wards thus relieving the nursing service personnel of considerable responsibility and at the same time insuring supervision of the students' work. To do this it was necessary to limit the areas in which the students had practice rather than placing them in all units throughout the hospital as was formerly done.

Over and above the improved education with consequent improved patient care desired by the school itself, the change made has been a step forward in meeting the recommendations of the Louisiana State Board of Nurses Examiners, namely: 1) supervised practice, 2) forty hour week, 3) reduction of evening and night duty from the current average of twenty-three and twenty weeks respectively to the maximum of twelve and ten weeks permitted.

INSTRUCTIONAL PERSONNEL

The teaching personnel with the exception of several meet the educational and experience requirements. The several who do not are presently attending classes at Louisiana State University. During the year two instructors earned the Masters degree, and one is working toward it. There have been thirteen resignations with nine replacements.

STATE BOARD OF NURSES EXAMINERS ANNUAL REPORT

Miss Carrie Spurgeon, Educational Supervisor of the State, made the official annual visit to the school on May 25 and 26 at which time she reviewed with the faculty the educational program, and discussed with the teachers and the supervisory staff of nursing service the current policies and practices relating to the work experience of students. The report indicates satisfaction with the progress being made, and recommendations for improvement included: 1) additional hand washing facilities in Dibert, 2) utilization of the Out-Patient Department and the Poliomyelitis Center for student experience, 3) elimination of night duty in the psychiatric and communicable disease services, and 4) application for national accreditation.

ANNUAL REPORT OF THE SCHOOL OF NURSING**Ending June 30, 1954****NATIONAL ACCREDITATION**

It is the ambition of the school to apply for national accreditation during the year 1955 before the term of Temporary Accreditation which the school presently enjoys. The need for such recognition becomes more evident each year.

RECRUITMENT

Efforts are being made to increase the student enrollment. The goal for the Fall class is one hundred and fifty students. The chief means of recruitment is the school catalog which is mailed to the accredited high schools in the Southern states. The school participates with the State Nurses Association Recruitment Committee and thus has an opportunity to make visits to local schools. Newspaper publicity is obtained whenever possible for the school activities.

SISTER PAULINE, R.N.
Director, School of Nursing

ANNUAL REPORT OF THE DIETARY DEPARTMENT**July 1, 1953 — June 30, 1954****ACTIVITIES AND ACCOMPLISHMENTS**

The Dietary Department graduated twelve dietetic interns, one of whom accepted a position on the staff.

Miss Wilma Robinson, Educational Director of the American Dietetic Association, inspected the internship in April, and again approved it to be continued. The recommendation to give the dietetic intern experience in the pay cafeteria at Baptist Hospital was carried out. The dietetic intern's service with this new affiliation covers eight successive weeks, four each of Pay Cafeteria and Private Tray Service.

The Dietary Staff works constantly with Tulane and Louisiana State Universities Medical Staffs in conducting special dietary studies. Among these were a study of a non-residue diet to show the effect on the liver of vitamin and mineral deficiency and a body chloride imbalance estimate.

The following list constitutes the bulk of patients instructed by the Nutrition Clinic:

Diabetic Classes	897 patients
Obstetric Classes	12,930 "
Individual Instruction—New—All Types	2,415 "
Individual Revisits	4,107 "

The Nutrition Clinic Staff actively participated with other Health Agencies in the City in the drawing up of plans to conduct a study on weight control in the City of New Orleans.

Members of the Dietary Staff have served on committees and/or as officers for the Local, State and National Dietetic Associations, and the Home Economics Club of New Orleans.

Special Diet cookery was taken out of the Diet Kitchen and is now prepared in the Main Kitchen.

A complete new cement floor was installed under the steam jacketed kettles. All valves and pipes on steam kettles were checked and repaired and put in first class working order.

A vegetable chopper was purchased which has enabled us to prepare all vegetables, both for cookery and for salads, in the vegetable room rather than the kitchen as formerly.

Our hamburger machine was completely overhauled and put in first class working order.

A dish scraping unit was constructed in the General Dining Room (formerly White Employees') to facilitate the service in this dining room.

Blue plastic dishes were purchased for all dining rooms to replace the white ones formerly used.

Two large pedestal fans were purchased and installed in the Graduate Nurses' Dining Room to help relieve the excessive heat.

With the renovation of the Dibert Building many improvements were made which were beneficial to the Dietary Department. A stainless steel 4 burner stove was moved from the Formula Room to the Dibert Building where it was badly needed.

The cafeteria line was redesigned in the Student Nurses' Home. The dining room was painted and redecorated and new drapes were hung.

The 11th floor was opened for Dietary Tray Service.

Civil Service classifications were completed on Dietary Department employees.

Comparative figures of meals served are listed below:

	1952-1953	1953-1954
Personnel Meals	1,418,830	1,284,063
Patient Meals	2,352,812	2,398,935
Total Meals	3,771,642	3,682,998
Special Diets Served	802,353	841,872
Infant Formulae Prepared	77,225	76,021

Meal Costs:

Food	\$ 901,663.59
Wages	365,214.43
Other Expenses	76,390.60
Formula Room Food	13,591.07
Total	\$1,356,859.69
Donations	\$ 30,916.77

Respectfully submitted,
SISTER THERESA, Director
Dietary Department

**ANNUAL REPORT
of the
HOUSEKEEPING DEPARTMENT**

July 1, 1953 to June 30, 1954

At the close of this year, the department, including the Linen and Sewing Section, is operating with 300 employees. The turnover of personnel during the course of the year was 166 as follows: 104 resignations including (four women who retired, and six men who entered the armed forces), 57 removals, and 5 transfers to other departments.

Additional responsibilities taken on this year are: 1) Complete housekeeping responsibility on the Eighth floor, with transfer of seven employees from Nursing Service to this department; 2) also all cleaning duties on the Eleventh floor, for which five additional Custodial Worker I positions were created; and 3) housekeeping in the new Recovery Section, 12th floor.

In July Germicidal disinfection was done to walls, ceiling, floors and furniture in the W-10th Nursery to combat an epidemic of diarrhea. The same procedure was done to wards C-702, C-703 and C-705 to combat Pyocystis infection.

Eight hundred sixty-three mattresses were renovated: 495 adult, 125 juvenile, and 19 crib mattresses in patient sections; and 224 mattresses in Personnel Quarters.

In the Salvage Division \$2,987.45 worth of salvage material was sold to salvage dealers.

The Pest Control Company and Window Cleaning Company performed their services as per contract.

The following new equipment was supplied:

2	Applegate linen marking machines for Main Sewing Room
1	Baling machine for Salvage Division
2	Silver King wet and dry vacuum machines
2	Sewing machines for Dibert Linen and Sewing room
The following linen replacements were made during the past year:	
7,304	Sheets for adult beds
3,431	Sheets for Juvenile beds and treatment tables
2,932	Crib sheets
1,200	Bassinet sheets
1,218	Bedspreads
7,218	Pillow cases
6,000	Bath towels
7,598	Huck towels
3,062	Glass and kitchen towels
16,380	Wash cloths
4,110	Patient gowns
3,153	Pajama suits
385	Robes
1,051	Contour rubber sheets
4,336	Bed pads
20,734	Diapers
1,356	Baby wraps
8,220	Sterile wraps
9,190	Surgical towels

1,042 Hamper bags
1,854 Aprons
900 Doctors Operating gowns
830 Doctors scrub suits
741 Nurses 1st gowns
1,008 Nurses 2nd gowns
1,917 Smocks, wrap around style

Respectfully submitted,

SISTER CLARISSE
Director of Housekeeping

STATISTICAL REPORTS
OUT-PATIENTS — ADMITTING ROOMS

Submitted by
SISTER IGNATIA, R.N., B.S.
Director, Out-Patient Department
Fiscal Year Ending June 30, 1954

**PRELIMINARY REPORT ON THE FOLLOW-UP OF
ALCOHOLICS TREATED IN THE ALCOHOLIC
REHABILITATION WARD AND CLINIC**

July 1, 1953 to June 30, 1954

Three hundred eighteen alcoholics had been treated in the ward and clinic. Each of these patients was sent a questionnaire. Up until June 30, 1954, answers had been received from 94 patients or 29.6% of the total group. Sixty questionnaires or 18.8% were returned because the patient no longer lived at the given address and his present address was unknown. This leaves 164 patients or 51.6% of the total group who have apparently received the questionnaire and have not as yet returned it.

Of the 94 patients who have answered the questionnaire, 78 or 82.9% were not drinking, 6 or 7.5% did not answer the question pertaining to sobriety, and 10 or 10.6% were drinking. Below is a table illustrating the sobriety distribution of the 78 patients who said they were not drinking.

REPORT POLIOMYELITIS CENTER**July 1, 1953 to June 30, 1954**

The Polio Center, located in the Lapeyre Miltenberger Home for Convalescents, occupies the 2nd, 3rd, and 4th floors. Second floor is being used as a combination isolation and respirator ward.

During this year a total of one hundred and thirty four patients were admitted. Out of this number, one hundred and four were diagnosed and treated for poliomyelitis. There were twelve respirator cases and three deaths. Four respirator cases were carried over from last year.

Children at the Polio Center receive instruction from a teacher employed by the Orleans Parish School Board. Monthly birthday parties are sponsored by schools of New Orleans and directed by the teacher. Moving pictures are shown weekly.

Respectfully submitted,

DOROTHEA ARMBRUSTER, R.N.
Supervisor

ELECTROCARDIOGRAPH DEPARTMENT

July 1, 1953 to June 30, 1954

The accompanying report shows the work performed in the Heart Station from July 1, 1953 through June 30, 1954. The figures refer to the number of electrocardiograms taken in each month, and to the number of arterial oxygen saturation studies, cardiac catheterizations, angiograms, and cardiac fluoroscopic examinations.

Many sound tracings of the heart were made during the current year but the breakdown for months is not available although the data were placed in the patient's records.

During the year cardiac clinics were conducted every afternoon, Monday through Friday, in order to maintain a closer check on patients with heart disease. There are also a pediatric cardiac clinic which is conducted every Friday.

Cardiac conferences were held every Thursday from 4:30 to 5:30 P.M.

DEPARTMENT OF ANESTHESIOLOGY AND BLOOD BANK

July 1, 1953 to June 30, 1954

During the fiscal year ended June 30, 1954, a number of changes were made in the Anesthesia Department and in the Blood Bank. The salary for residents was increased. The quota was increased. Dr. Margaret Kerr remained on the staff but was classified as an Anesthesiologist I by Civil Service. In addition a position of Assistant to the Director was created which was filled by Doctor Helen Wallace, one of our former residents. Dr. John Parmley, Director of Anesthesia at Hotel Dieu and Dr. Walter Mannheimer, Director of Anesthesia at the Veterans Administration Hospital were appointed to assist in the instruction and supervision of residents.

New equipment was purchased to permit the performance of modern surgical procedures requiring hypothermia. A electrically driven cooling blanket, a recording rectal thermometer, a CO₂ analyzer oximeter and a Bennett positive pressure apparatus were purchased. A dozen oxygen tents for pediatric use were likewise added to the equipment as well as two dozen oxygen regulators for administering oxygen by the catheter technique. The quota of residents was increased to twelve. During the year 22,000 anesthetics of all types were administered to obstetrical and surgical patients.

In the Blood Bank the system of processing and manufacturing our bottles and tubings were discontinued and the standard vacuum disposable equipment was adopted. During the year there were 19,757 transfusions administered and 21,000 bottles of blood collected.

Sincerely yours,

JOHN ADRIANI, M.D., Director
Department of Anesthesia

LUNG STATION

July 1, 1953 to June 30, 1954

During the fiscal year from July 1, 1953 to June 30, 1954 the facilities of the Lung Station were considerably expanded physically. The addition of new space allowed rearrangement of diagnostic and therapeutic facilities to achieve a more functional integration with the facilities of the Heart Station. New diagnostic equipment was installed and should be in operation during the next fiscal year.

Partial or complete studies of ventilatory function accounted for five hundred and twenty-four examinations. The respiratory studies involving the determination of pulmonary gas exchange were carried out on fifty-seven occasions. Bronchspirometry was performed thirty-six times during the year. Arterial blood studies were done on twenty-nine occasions. Miscellaneous pulmonary diagnostic studies accounted for forty-three studies.

The therapeutic facilities for the Lung Station had been overtaxed during the previous fiscal year and it was necessary to greatly restrict intermittent positive pressure aerosol therapy in the Lung Station. Nevertheless, one-hundred and fifty-one positive pressure treatments were given. Although the Lung Station was unable to devote additional time to inhalational therapy, residents in the hospital were permitted to sign out the therapy equipment for ward use under their own supervision. Continuous, controlled induction of pneumothorax was carried out on two occasions for special therapeutic reasons.

Respectfully submitted,

JOHN H. SEABURY, M.D., Director
Lung Station

I. INTRODUCTION

This annual report for the fiscal year 1953-54 has been prepared from documents and committee meetings available in the office of the Medical Director for the Premature Center by Doctor William T. Newsom, who assumed the duties of Medical Director for the Premature Center on August 16, 1954. Doctor Elaine Allen, the former Medical Director for the Premature Center, left in the files certain preliminary drafts of material which she felt should be included in this annual report. Such information is included as noted in quotation marks.

II. ADMINISTRATIVE AND COMMITTEE ACTIVITIES

The Committee on the Premature Infant Center of Charity Hospital met five times during the fiscal year. During the course of four

of these meetings, all held in 1953, the following material was discussed and acted upon as indicated:

1. Many problems related to nursing personnel and the special premature infant nursing course were discussed in detail and occasionally definitive action was taken, such as an invitation to the Director of the School of Nursing of Charity Hospital to be made a member of this Committee.

2. The final report of the Urban Life Research Institute Study was brought up for discussion several times and the Committee recommended that this report be presented to the Charity Hospital Board of Administrators for permission to release the information contained in it.

3. Suggestions were made regarding the initiation of another study be done with the aim in mind of analyzing specific duties and responsibilities of all levels of nursing personnel. Plans for such a study were later prepared but never discussed further (apparently because of lack of approval of the funds necessary to employ an experienced person capable of conducting such an investigation).

The final meeting of the Committee on the Premature Infant Center during this fiscal year was held on June 30, 1954, at which time the recommendation was made for the appointment of Doctor William T. Newsom as the Medical Director of the Premature Center to replace Doctor Elaine Allen, who had resigned on January 30 and left the Center in April 1954.

The Steering Committee of the Premature Infant Center met twice during this fiscal year, both times in January 1954. The first meeting considered steps to establish the position of Supervisor for the Premature Center and recommendations were made that this be included in the preparation of the budget for the next fiscal year. Revisions of the sections of the special project planned for the training program in the Care of Premature Infants that applied to the Nursing Educational Director were presented to the Director of the LSU Department of Nursing Education. These revisions were discussed at length and with minor changes were referred to the members of the Committee on Premature Infant Care. However, no further official action in regard to adopting these changes has been made.

The Medical Director distributed to members of the Committee on Premature Infant Care just prior to her leaving a brief summary of major problems for definitive consideration and action by the Premature Committee. The major problem described was that related to personnel shortage, inadequate space and facilities to meet peak population loads and the resulting curtailment of many important and necessary service functions. Concern was also expressed over the inadequacy of supervision of student nurses assigned to the Unit. Definitive policies related to the transportation of premature infants to this Center from other hospitals have not allowed for utilization of the Premature Follow-up Clinic in the fields of service and of teaching. A suggested Physician's Discharge Summary Sheet should be considered to become part of the premature's permanent hospital record. The last specific recommendation made by Doctor Allen for consideration as "outstanding business" is as follows: "In spite of several attempts and abortive discussions, the Committee has not adequately discussed and evaluated the Urban Life Report in terms of its significance for the practice on our own Unit. Instead, this type of evaluation was deferred until another study, this one regarding head

nurse functions, could be made. Since funds for this second study have not been approved, it would seem desirable at this time to give serious consideration, not just lip-service, to the value of the Urban Life Report, and try to learn something from it, and make application of this. For instance, the study would seem to indicate that more formal recognition be given to the role the aides play in the operation of the unit. For example, should they not chart those procedures they perform? And should not conditions be created that would permit inservice education to proceed?"

A Newborn Nursery Committee was appointed to consider the possibility of relieving the excess patient load in the Premature Center by allowing prematures of 2000 grams or more in birth weight to be cared for in the Newborn Nursery on the tenth floor as one of the possible solutions to this problem as mentioned in the annual report for 1952-53. Although their report and recommendations were not officially considered by the Committee on Premature Infant Care, it seemed to be generally agreed that facilities and staffing of the Newborn Nursery were not suitable to accept this extra burden of small infants. The specific findings and suggestions of this Committee for improvement of facilities and staffing in the Newborn Nurseries were referred to the Medical Director of the Premature Center; however, further consideration during this year was not possible.

III. SERVICE ACTIVITIES

A. Statistics

The statistical data for presentation in this annual report will be limited to a complete and accurate tabulation of total admissions, survivals and survival rate for infants admitted to the Premature Unit due to the failure to maintain more detailed data for punch card analysis resulting from personnel shortages and other difficulties during this period. The first two tables have been prepared in a form similar to that used in the last annual report so that comparisons can be made. Table I deals with premature infants delivered at Charity Hospital. Table II is concerned with premature infants born outside and admitted to this Unit. Table III illustrates the comparative survival rates for this and the previous fiscal year. Although it is readily apparent that a slightly improved survival rate has resulted during this fiscal year, this improvement is not statistically significant.

Of the total of 213 infants having a birth weight of less than 1500 grams who were discharged in apparent good health from this Center, our present records indicate that a total of ten eyes among six children have been permanently blinded by retrolental fibroplasia. This reflects an incidence of less than three per cent permanent blindness among our surviving infants in this weight group.

In an attempt to more accurately define at least one of the factors responsible for some of the personnel problems described in the next section, Table IV has been included to demonstrate the progressive increase in the total numbers of newborns and prematures cared for in the Premature Center and Newborn Nurseries of Charity Hospital. It may be noted that this increase has been occurring concomitantly with a variably diminishing staff of registered nurses and a necessary increase in the complement of auxiliary workers.

B. Personnel

In view of the improved survival rates during this fiscal year, as shown in the statistics, it may be surprising to note that many people felt this to be a most difficult year in terms of morale and adequacy of staffing. Of particular interest in this regard, attention is called to the resignations as reported in the section prepared by the Nursing Service Division. The following remarks by Doctor Elaine Allen in her initial draft of this annual report may be of interest: "The situation at present is less rosy than at any time in my experience with this Unit. The immediate problem is one of staffing, primarily, but the staffing problems have their origins, I believe, in the concept of some that educational, nursing service and medical functions should not overlap, but should proceed independently of one another."

C. Report of Nursing Service Division as Related to Premature Center

During the fiscal year 1,338 infants were admitted to the Premature Infant Center. The daily average population of this service was 101 patients. To give nursing care to these patients, the Nursing Service Department had in its employ one June 30, 1954, eighteen professional nurses and thirty-eight nurse aides. Additional employees included one Central Service Worker, one Custodial Worker, one Typist-Clerk. During this fiscal period, the following changes in the professional staff were effected.

	Resignations	Employments
Educational Director	1	0
Assistant Supervisor	1	2
Head Nurses	6	1
General Duty Nurses	4	6

Transfers

Supervisor (religious)	1
Assistant Supervisor	1

Efforts were made to recruit professional nurse personnel for the positions available in the division, with very little success. The total number of nurse personnel decreased from twenty to eighteen, with most of the vacant positions in the head nurse group. Our inability to recruit a teaching supervisor for this area still hinders the establishment of an adequate inservice training program for personnel. The nurse aide training program for employees of the hospital in general does not apply to the care of premature infants; however, professional and non-professional personnel continue to receive individual orientation and teaching in preparation for their positions.

In February 1954 the Director of Nursing Service and selected personnel in the Premature Infant Center conducted a study of head nurse activities. These activities were broken down into area, duration and level of activities in each of three nurseries, the study not being considered applicable to the fourth nursery. A summary of the findings indicated that head nurses in the Premature Infant Center spent the largest portion of their time on activities which fall within the staff nurse level, with the head nurse, nurse aide, and clerical levels following in that order. In the duration of activity, direct and indirect care accounted for the largest portion of the head nurse's time, as well as for the

most frequent of all activities. The transfer of the Director of Nursing Service shortly after this study, and the absence of a supervisor in the division, prevented any further work along this line.

In May 1954 job specifications were revised for the following nursing personnel: Supervisor, Assistant Supervisor, Head Nurse, Clinical Instructor and Instructor in Nursing Education. These revised forms were submitted for approval to the Children's Bureau through the Louisiana State Department of Health. At the close of the fiscal year, the revised forms had not yet been returned to the Premature Infant Center by the Children's Bureau.

Efforts are continuing along the lines of recruitment of nursing personnel, inservice training, and general improvement in nursing care, and it is hoped that the coming fiscal year will show improvement in each of these fields.

D. Report of Social Service Director Service to Families

The social worker has continued to help the families with their problems as much as possible. She has made a particular effort to talk at least once with each mother who delivers at Charity Hospital. Many of these mothers need nothing more than some factual information about their babies plus some reassurance, but there have been others who seemed to require more help. For example, there was the fifteen year old mother who failed to bring her baby back to the clinic although she had been told when she took the baby home that the child had a cataract on one eye. Money for transportation was sent to her but she did not think that it was enough to allow for incidentals. Since this did not seem to be a valid reason for her not coming to the clinic and because she was very young, she was referred to the Department of Public Welfare for guidance and supervision. She did not need financial assistance because her husband worked. After several months of working with this mother, the Department of Public Welfare was successful in getting her to bring the baby back for an eye examination, resulting in successful dissolution of the problem.

Referral of occasional special cases to the local Family Service Society has not been found to result in satisfactory follow-up of these cases. Further coordinated planning with this Agency seems to be necessary prior to successful utilization of their potential assistance.

Teaching

The social worker has continued to participate in the teaching program for graduate nurses and Charity Hospital student nurses as in previous years. There have been no drastic changes in her activities in this area. For a period of time the social worker met with groups of LSU medical students to discuss with them the kinds of social problems found on the Premature Unit.

3. Interpretation to Interested Individuals	242
4. Children Referred for Foster Home Placement	2
5. Children Referred for Adoption	2
6. Number of Home Visits Made	12

E. FACILITIES

Limited reorganization and remodeling of the tenth floor Newborn Nurseries was accomplished in the fall of 1953; however, as pointed out above, standards in this nursery may still be inadequate to care for prematures of 2000 grams and over. It may be suggested that a restudy of this situation seems to be indicated.

No new equipment was purchased during this year. All Isolette incubators in the Premature Nursery were completely overhauled and reconditioned.

F. PROCEDURES

No important new procedures were developed during this fiscal year. The use of a commercially available detergent in mist producing devices for incubators was found to be quite damaging to the incubators and, in addition, studies completed elsewhere and reported in May 1954 indicated that this method of treatment is apparently of no value in reducing morbidity or mortality and hence the procedure has been abandoned.

Copies of the Premature Nursery Medical Policies and Procedure Book have been exhausted and in view of both changing personnel and medical policies this document should be rewritten in its entirety.

G. FORMULA ROOM

During the course of this Center's cooperation in a nationwide study on retroental fibroplasia, it became necessary to standardize on a single evaporated milk formula for all babies throughout their stay in the nursery. This was found to be helpful in expediting formula preparation for this Unit. Only rarely was an occasional infant given an individual formula different than the one in routine use, which was one part of evaporated milk, two parts of water and six percent added carbohydrate.

In April 1954 the Formula Room supervisor resigned and was immediately replaced.

H. PARENT EDUCATION

Formal parent education to groups of parents of premature infants has been abandoned in favor of individual guidance and instruction of the parents of each premature infant by nursing service personnel at the time of discharge of the infant. All parents are so instructed in a session lasting twenty to thirty minutes, at which time formula preparation and bathing and other general care procedures are discussed and demonstrated in detail.

IV. INVESTIGATIVE ACTIVITIES

A. CLINICAL

Beginning in July 1953 this Center participated in a cooperative nationwide project investigating the possibility of a relationship between high oxygen concentrations and retroental fibroplasia. This project was sponsored by the Kresge Eye Institute of Detroit and the National Institute of Health. Our contribution to this project was sponsored locally by the Southern Eye Bank of New Orleans as a cooperative effort of the Departments of Pediatrics and Ophthalmology of both LSU and Tulane Schools of Medicine. Throughout this fiscal year over one hundred infants with birth weights under 1500 grams were included in this study. Follow-up studies of these patients in the outpatient department are still in progress and no report of results are as yet available.

A member of the Department of Pediatrics at Tulane School of Medicine carried out investigations to determine the survival time of radioactivated gamma globulin. It is hoped that results of this study will provide basic information as to the dosage and time interval for administering gamma globulin to be of value in reducing morbidity and mortality from infections in premature infants. This study has been completed and results are now being analyzed.

A study concerned with the "Serum Desoxyribonuclease Activity in Premature and Term Infants" by Doctors Obrinsky, Kurnisk and Fichter was completed under the auspices of the LSU Department of Pediatrics, the Tulane Department of Medicine and Charity Hospital. This study was read before the annual meeting of the Society for Pediatric Research in Buck Hill Falls, Pennsylvania. The study contributed concrete evidence of hepatic immaturity in premature infants differing from that in term infants or adults.

B. Publications

The report of nursing service study in the Premature Infant Center carried out under the auspices of the Louisiana State Department of Health, Charity Hospital of New Orleans and Tulane University, by the Urban Life Research Institute of Tulane University, was published in a preliminary limited edition and further distribution and dissemination of this collected information is awaiting administrative decision.

A paper entitled "Physiologic Hyperbilirubinemia in Premature Infants" by Doctors Obrinsky, Allen and Anderson was published in the American Journal of Diseases of Children, March 1954, based on serial bilirubin determinations during the course of hospital stay in twenty-seven premature and twelve term infants carried out during the last fiscal year.

V. PROFESSIONAL EDUCATION

A. Medical

1. Visiting

Informal discussion and education was provided the many frequent physicians who visited the Center. No formal post-graduate course in premature care was offered to physicians. Our most outstanding visitor during this fiscal year was Doctor V. Mary Crosse, who spent considerable time in our Unit during November 1953. Through her discussions with both medical and nursing staffs related to her experiences with premature infants in England, she was quite helpful in impressing upon our staff the seriousness of administration of oxygen to premature infants.

The Medical Director of the Premature Center contributed to the programs of the Tulane Pediatrics Department held annually for pediatricians.

2. Staff

Approximately twenty new pediatric residents and ten interns were rotated through the Premature and Newborn Service and received guidance and instruction from the nursing staff, Medical Director and the responsible pediatric service, either LSU, Tulane or Independent.

3. Undergraduate

The Medical Director of the Premature Center continued to participate in lectures and demonstrations related to premature infants provided the junior and senior medical students at both Tulane and LSU Schools of Medicine.

B. Nursing

1. Undergraduate

The Director to the Charity Hospital School of Nursing reports that during the fiscal year 1953-54 there were 142 Charity students and 21 affiliating students who received two weeks nursing experience in the care of premature infants.

2. Graduate

Admissions, Survivals and % Survivals of Infants Admitted to the Premature Unit, Delivered at Charity Hospital
of Louisiana at New Orleans, July 1, 1953, through June 3, 1954, by Race, Sex and Weight.

**ANNUAL REPORT
THE CANCER REGISTRY
July 1, 1953 to June 30, 1954**

Prior to this fiscal year, annual reports on the Cancer Registry were included in the report from the Medical Social Service Department and referred to as the "Follow-Up Program."

The year July 1, 1953 to June 30, 1954 was a very significant year for the Cancer Registry in that many changes took place. The Registry was converted and expanded into a Tumor Registry meeting the standards and requirements as outlined by the Committee on Cancer, American College of Surgeons. This was accomplished through the guidance and direction of a Cancer Registry Board, a Medical Consultant and a Statistical Consultant, the latter from the National Office of the American Cancer Society in New York.

Administrative Relationships:

Members of the Cancer Registry Board:

- Dr. Edmund L. Leckert, Director, Charity Hospital of Louisiana at New Orleans
- Dr. Walter J. Burdette, Louisiana State University School of Medicine
- Dr. E. Krementz, Tulane University School of Medicine
- Dr. J. D. Martin, Louisiana State Board of Health
- Dr. Rawley M. Penick, Louisiana Division, American Cancer Society

Chairman, Cancer Registry Board:

- Dr. Walter J. Burdette

Medical Consultant:

- Dr. Victor Tedesco

Statistical Consultants, American Cancer Society, New York:

- Dr. E. Cuyler Hammond
- Dr. Aubrey Schneider
- Mrs. Constance Percy

Executive Secretary, Louisiana Division, American Cancer Society:

- Mrs. Marian Simmons

Accomplishments:

The Registry was moved from a small office on the eighth floor to a larger space in the Clinic Waiting Room, first floor. The necessary equipment, such as keypunch and card sorter machines were secured. Additional personnel were employed; two statistical research assistants and ten medical students. The latter were employed on a temporary basis. Three visits were made by Statistical Consultants from the New York Office for the purpose of designing the forms, codes, procedures and training the personnel. The Medical Consultant has assisted with medical problems beyond the scope of the staff and the Chairman of the Cancer Registry Board with administrative and policy problems. The medical records of cases of malignant diseases diagnosed since January, 1948 have been abstracted, coded and the information punched on cards. Informational follow-up is being added to the records. The material has been made available to doc-

tors and other hospitals requesting such information for research, teaching and demonstration.

Content and Extent of Service Provided:

Establish the identity of every cancer patient seen at Charity Hospital, diagnosed since January, 1948 and developed a master file for the entire hospital case load.

Obtain follow-up information on all cancer patients at annual intervals.

Abstract the medical records of each cancer case complete with follow-up findings and organize the material in such a way as to provide useful materials for evaluating the results of therapy, for research studies, for teaching and for demonstration.

Provide for an exchange of information with the Board of Health which will serve to facilitate clearance of all death reports on cancer patients.

Volume of Cases:

Year of Diagnosis	Alive at last Follow-up	Deceased	Total
1948	451	1,043	1,494
1949	615	1,045	1,660
1950	595	981	1,576
1951	654	804	1,458
1952	907	647	1,554
1953	1,225	421	1,646
Totals	4,447	4,941	9,388

Estimated Growth:

From 1948 through 1953 there was 9,388 cases for a six year period or an average of 1,565 new cases per year.

Information Available from the Registry:

(1) Regarding Cancer or Patients

Any information or combination of information on the code from the punched cards on:

A—Statistics

B—Identity of patient by name and hospital record number.
From the patient's folder in the Registry:

C—Summary from medical chart and record of follow-up.

(2) Regarding the Registry:

- A. Handbook or manual, Cancer Registry, Charity Hospital of Louisiana at New Orleans.
- B. Copies of reports sent to or received from other hospitals, etc.
- C. Bulletin boards, maps, etc. with statistics and information displayed.
- D. Departmental file—personnel, budget, etc.
- E. Copies of reports on cancer given to individual doctors.
- F. Scrapbook—published reports.
- G. Guestbook—identity of visitors.

Respectfully submitted,

(MRS.) MARION WOGAN, Director
Cancer Registry

ACTH 25 Units	200	Vials

The new Solution Room was put into operation in July, 1953, for the purpose of manufacturing as many as possible the routine sterile solutions used throughout the hospital. One Hundred Eleven Thousand Seven Hundred and Twelve (111,712) liters of Saline, Dextrose NaK, etc. were produced as well as 76,314 bottles of procaine, normal saline and other solutions of varying sizes and strengths. Total cost of operation, including labor, was \$58,684.84. Had these same solutions been purchased, it is estimated the total cost would have been \$120,756.43.

In the general manufacturing laboratory, a total of 55,831 gallons of non-sterile solutions were made. Syrups, Elixirs, Liniments, Lotions and mixtures totaled 3,336 gallons, Soaps 4,860 gallons, tinctures 2,673 gallons, laboratory stains and reagents 327 gallons, ointments 660 pounds and tablets 1,664,600. Total cost of manufacturing these products, including bottles and labor, was \$59,437.15. If these items had been purchased, it is estimated the total cost would have been \$246,408.35.

MEDICAL SOCIAL SERVICE DEPARTMENT**July 1, 1953 to June 30, 1954**

The principal function of this department is to help patients with personal and family problems related to their illness. Such problems might prevent the patient from receiving maximum benefit from medical treatment and thus interfere with his recovery from illness, as for example, the ulcer patient whose anxieties about his family are retarding his recovery, or the diabetic patient who cannot afford to pay for insulin and a special diet. Other problems for which patients need help are those which are caused by the illness as in the case of the incapacitated patient who is no longer able to support himself and his family, or the patient whose emotional reaction to a crippling or disfiguring injury interferes with his physical and economic rehabilitation. The types of problems encountered cover a wide range, varying from simple ones requiring only a minor service, to very complicated ones whose solution requires a high degree of professional skill. Services are given at the request of doctors, nurses, other hospital personnel, the patient or his family, interested individuals in the community, or other social agencies.

During the year 1953-54 the social workers helped 149,047 patients and their families, an increase of 17,554 over the previous year. Permanent records were kept of 67,706 cases; unrecorded services were given to 81,341. The latter were mainly cases in which only a minor service was given, and in which it was not believed important to have a permanent record on file. However, also included in this group were some cases in which a permanent record would have been valuable, but which the workers were not able to write up because of pressure of time.

One type of service the social workers give consists in helping the patient and his family understand his medical condition, its limitations, and treatment recommendations, thus enabling him better to follow recommendations for treatment, and also to meet the problems of adjustment resulting from the illness. Conversely, in many instances, the physician and other hospital personnel need to understand the patient as a person: his attitudes and reaction, background, family patterns, resources and the like. Such an understanding is difficult for the physician to acquire for himself in a large public hospital, where large numbers of patients are treated. Interpretation of both types was given in 25,959 cases. Another type of service given by the Social Service Department is to act as liaison between the hospital and other social agencies in the community. This would involve referring patients to other agencies for help and interpreting to the agency the patient's medical needs. A total of 3946 patients were referred for assistance to other social agencies such as the Department of Public Welfare, Vocational Rehabilitation, Family Service Society, Associated Catholic Charities, and Children's Bureau. In many instances, patients already known to other social agencies present problems when they come to the hospital for treatment. The other agency can help with these problems when they understand the patient's medical needs. Interpretation of this kind was given in 26,021 cases.

Other services given included 403 chronically ill patients referred for care in their own homes, in nursing homes, institutions, and 144 children referred to child-placing agencies for adoption, foster care, or institutionalization.

Some of the patients' needs, such as medication and appliances, are met through the use of funds which are available through the hospital. The amount available through these funds is small, and meets only a small

percentage of the total need. The funds are the Insulin Fund (\$500 a month provided from hospital funds), the Patients Welfare Fund (\$100 a month also provided from hospital funds), the Weil Convalescent Fund (\$30 a month from interest on a sum which was bequeathed to the hospital for use for medical relief for convalescent patients), and the Stauffer-Eastwick Fund (\$400 a month, also from interest from a bequest, which is limited to the use of white patients). These funds, not including the Insulin Fund, were used as follows: \$5146.57 was spent for medicine for 2002 patients, \$1871.01 for appliances for 211 patients, \$901.01 for transportation for 368 patients, and \$607.45 for maintenance for 131 patients, making a total of \$8526.04 for 2712 patients. Figures for the Insulin Fund are not included in the above, as records for this fund are kept in the Pharmacy and not in the Social Service Department. The amount of money spent for patients this year was \$120.97 less than last year, and 107 fewer patients were given this type of assistance.

There are also funds made available to the department from sources outside of the hospital. These include \$10 a month from the Social Justice Fund of Temple Sinai, glasses from the Lion's Club (no specified number), and \$200 a month from the Tuberculosis Association for patients with tuberculosis who are being treated on an out-patient basis.

Following the resignation of the Director of the Social Service Department on May 3, 1954, an acting Director was appointed through the end of the fiscal year. A permanent Director was appointed effective July 1, 1954.

Another function of this department is to determine eligibility of patients applying for treatment. Trained social workers are not used in this unit, but the interviewers are supervised by one of the Social Service supervisors. During the year a total of 26,553 patients were interviewed, of whom 19,682 were found to be eligible, and 6871 ineligible. Of the ineligible patients, 4845 were seen in the accident room, 1453 in the clinics, and 573 in the wards.

Approximately 12% of the total number of patients applying for care were interviewed. Cases are selected for investigation on the basis of a financial scale suggested by the Medical Society. Patients reporting incomes over this scale are interviewed and the decision regarding eligibility is made on an individual basis, taking into account the cost of the treatment needed, past expenses for medical care and the like. The staff of this unit consists of nine interviewers, which is not enough to handle as many investigations as should be done. Even though this unit is not expected to do more than screen the more obviously ineligible patients, it would operate more efficiently if the staff were enlarged, particularly if a full time supervisor could be assigned.

MARIGAYLE H. HART,
Director, Med. Social Dept.

**ANNUAL REPORT
MEDICAL AND PATIENTS' LIBRARY**

July 1, 1953 to June 30, 1954

Staff

There has been a few changes in the staff since the last report. Mrs. June Nusser, Librarian, resigned on October 30, 1953. The position was filled by Mrs. Dawn Wilson on November 1, 1953. Mrs. Dawn Wilson resigned on May 31, 1954 and Mrs. Lily E. Twining was assigned to the position. During the year there were twenty-four volunteers who helped in the library on the wards. They worked a total of two hundred and thirty-seven hours.

Reading Room Activities

The library attendance constantly shows an increase. Doctors, both visiting and staff men, use the medical journals and medical books for quick reference. The professional staff seem to derive a great deal of pleasure from relaxing with a book or just browsing. Many requests and suggestions are welcomed and used pertaining to the library. Displays are changed often to interest the staff in the different and new books in the library. Assistance is given to all readers who wish it.

Ward Activities

Ward rounds were covered daily by regular schedules of the staff and volunteers. Volunteers are trained for their ward round before being sent out. Special attention is given by the volunteer or staff member to interest a patient in a book or magazine so his morale can be improved. All books are carefully read before being circulated on the wards. Patients seem to appreciate the library service.

Many gifts of pocket books, magazines and cloth bound books were donated to the library. They were given by clubs, churches, business houses, and individuals. The professional staff donated many books in the past year.

Statistics

1,370	Rainbow Girls
18	Rio Vista Baptist Church
17	St. Charles Avenue Presbyterian Church Circles
14	Sigma Delt Chi (High School Sorority)
14	Touro Synagogue Group
217	Women's Volunteer Sewing Guild
6	YWCA Teens

The Volunteer Office registered over 779 new volunteers during the year who were referred by friends, patients, staff, and community organizations or recruited by radio, newspaper publicity, and personal contact. 13 Orientation Classes and Tours were conducted for 248 new workers. Recognition was provided to 176 individual volunteers who met the standards of cumulative service hours required for the Charity Hospital Volunteer Emblems, Pins, and Bars. In addition 155 volunteers received the annual certificates distributed by the Community Volunteer Service at the city wide volunteer recognition meeting in March.

Many types of donations were received in the Volunteer Office and distributed to various Hospital Departments. More than 124 thank-you letters acknowledging gifts were written to organizational or individual donors of TV Sets, Radios, Phonographs, Records, Sitting Room Furniture, Toys, Bicycles, Games, View-Masters, Books, Magazines, Holiday Favors and Tray Mats, Party Refreshments and Favors, Craft and Occupational Therapy Materials, Entertainment and Puppet Shows, Clothes and Baby Garments, Christmas Decorations and Individual Gifts, Candy, Fruit, Easter Eggs, Cigarettes and Tobacco.

The Volunteer Advisory Committee's coordinating projects for the year included the Annual Meeting for volunteers, the Christmas Toy Distribution, the evaluation of overall Christmas activities, the study of

teenage volunteers, revision of the Volunteer Awards Plan, sponsoring publicity and radio spots, and planning and teaching Orientation Classes.

Membership of this Committee included representatives of key community organizations, individuals, staff, and volunteers.

REPORT**HAPPINESS HELPERS-SUNSHINE BRANCH OF
LOUISIANA SUNSHINE SOCIETY****July 1, 1953 to June 30, 1954**

Herein, are informative facts relative to the Happiness Helpers of Charity Hospital of Ninth Floor, Sunshine Branch of the Louisiana Sunshine Society.

Happiness Helpers Sunshine Branch is a chartered volunteer charity organization—one of fourteen Sunshine groups in New Orleans and Jefferson Parish, affiliated with the International Sunshine Society, 15 Park Row, New York 38, N. Y., Mrs. Mae Simpson is Pres. General.

Happiness Helpers was first organized in 1935 with Mrs. Sara Lee Judis as President. In March 25, 1949 this name was changed to Happiness Helpers of Charity Hospital Ninth Floor Sunshine Branch.

Our chartered organization's funds are derived from dues of the membership, donations from members and from friends of the Branch; particularly friends of Pres. Sara Lee Judis who recognize and appreciated her long wonderful service in the Charity Hospital in volunteer charity work. Her annual Birthday monetary remembrances have always been donated by her to the branch.

In 1951, August 27 a donation of (\$500.00) Five Hundred Dollars in honor of the birthday of Pres. Mrs. Sara Lee Judis to the 9th floor Bed Endowment Fund.

In 1952, August 27 this donation of \$500.00 to the 9th Floor Bed Endowment Fund was repeated on Mrs. Sara Lee Judis's birthday.

In 1953, August 27, again, this Birthday donation in honor of Mrs. Lee Judis was given Five Hundred Dollars to the 9th Floor Bed Endowment Fund.

Happiness Helpers dispenses happiness in entertainment and refreshments for the 9th floor children, and on special occasions for the Negro children also. Many personal helps have been given financially in connection with cases involving children in need in families.

We have enjoyed carrying on our "Service for Others" for the past nineteen years in Charity Hospital, and intend to strive to have bigger and better plans and projects as time passes on with our devoted President, Sara Lee Judis at the helm of Happiness Helpers of Charity Hospital and the continuous co-operation of the interested membership and the many loyal friends.

Respectfully,

- (s) MRS. ERNEST A. RAPPANNIER, Treasurer
(s) MRS. SARA LEE JUDIS, President

**ANNUAL REPORT
CLASSES FOR HOSPITALIZED CHILDREN
Sponsored by: Orleans Parish School Board**

CLASS FOR WHITE CONVALESCENTS

Instructor: Selma K. Fasting, M.A.

Enrollment	Boys	Girls	Total
1. Total enrolled during session	244	168	412
2. Average daily enrollment	20	16	36
